

Macroeconomic Models: Weekly Update

Chris Comiskey, Open Data Group

May 9, 2018

- The regression line only does slightly better than the RIW25 line, so arguably there's no reason to use the regression equation when overfitting is a concern.
- $R_{25}^2 = 0.9937$
- $R_{70}^2 = 0.9997$
- $R_{\text{LinReg}}^2 = 0.9998$
